FEES AND INSURANCE

We are participating providers for Medicare and most of the major health plan providers in this area. Our staff can tell you if your plan is included. As a courtesy, we will file your insurance for you.

Please bring your insurance card to every office visit. Co-payments are required by your insurance company on the day services are rendered.

Payment for services not covered by insurance is requested on the day of the visit unless other arrangements have been made with the office. To assist you financially, we offer the following payment options.

Cash, Check and Major Credit Cards

For question about your insurance or billing issues, please contact our billing office at
713-351-0630

Houston Metro Urology offers our patients state of the art urologic care. Our physicians and staff are committed to providing high quality health care in an atmosphere promoting both the health and comfort of our patients and their families. With 16 physicians and 10 locations, we are the largest single specialty urology group practice in the Houston Area.

Welcome to Houston Metro Urology. We strive to provide you the best quality of urologic care through advanced technology and pharmaceuticals. We are affiliated with hospitals and other physicians who share a reputation for excellence. - Voiding Disorders
- Vaginal Prolapse
- Varicocele
- Vasectomy

For a more complete explanation of our services, as well as patient instruction and drug descriptions, please visit our web site at www.hmutx.com. Our web site also gives more details about our locations and our physicians.

Our central office provides the most technically efficient CT Scan equipment to aid in the diagnosis and treatment of our patients. In addition, we also provide the most advanced radiation therapy for prostate cancer.

The CT Scanner is one of the best diagnostic tools for analyzing urinary system disorders by providing detailed cross sectional views of all types of tissue. Our professional team of radiologists and technicians assures that our patients are receiving accurate information for the best treatment by our team of physicians.

Our Varian Dynamic Targeting IGRT (Image-guided radiotherapy) provides state of the art treatment for prostate cancer. This new automated system for image-guided radiation therapy provides the physicians with images that help to guide the treatment. This distinct approach provides images with different types of information about the tumor and surrounding anatomy, revealing changes in tumor shape, size or position over a multi-week course of treatment. Through the precise targeting of the beam, tumors get a higher dose of radiation while healthy surrounding tissue gets very little.

At Houston Metro Urology, we strive to provide the best and the most advanced care for our patients. This highly advanced technology for cancer treatment, together with our other diagnostic equipment, aids our physicians and staff to provide that care.

Scheduling an Appointment

Office visits are by appointment only. This includes appointments with physicians, as well as with nurses, medical assistants, technicians or other staff.

We schedule appointments 9:00 a.m. - 5:00 p.m., Monday through Friday. We do our best to provide a convenient time for you to see your physician. Please call the telephone number listed for your physician in this brochure.

New Patients

If you are new to our practice, we will ask you to complete a patient information sheet and our patient history form. Please allow extra time for completing these. If you wish, we can fax the form to you so you can have them filled out in advance. You may also fill in these forms online on our web site at www.hmutx.com

Lab and Procedure Results

We will inform you of lab and test results as soon as we have them. If you have not heard from our office in 5 days, please call us to get your results.

We are affiliated with the following hospitals:
